

# IDEAL LIFE Gluco Manager™

- Easy To Use
- Does not require a PC
- Real-time reporting of information
- Two way communication built in\*

The IDEAL LIFE Gluco Manager™ is a convenient, affordable and easy-to-use glucose meter. This innovative device automatically and wirelessly communicates blood glucose readings without the need for a personal computer, cumbersome wires, or manual data entry.

Some service providers offer online hosting of a patient's blood glucose data on a fee-for-service basis. But many diabetics have problems with cable connections or software compatibility, and find inputting data too time-consuming and inconvenient.

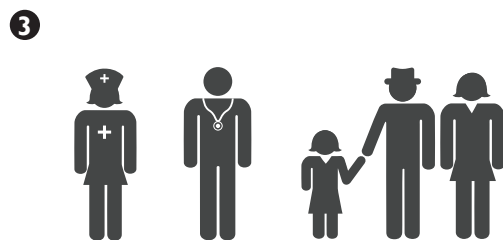

IDEAL LIFE completely eliminates these problems. Our innovative products work with multiple communication channels, and can be used at home or on the road.

The IDEAL LIFE Gluco Manager™ uses test strips that require only a very small sample of blood and comes as part of a package that includes a starter kit, the IDEAL LIFE Pod™ (the system's wireless gateway), and the IDEAL LIFE communication and information management service.

This complete Diabetes Management System is available absolutely free through select health plans. For others, the cost to users is for a daily supply of modestly-priced test strips.

\*When used with IDEAL LIFE Pod™ (sold separately) for use with IDEAL LIFE Health Management System™

## HOW IT WORKS

Healthcare team, family members and individual users

**1 Select Your Communication Gateway**

- With in-home access to a landline or the internet, use the IDEAL LIFE Pod™ for communication with any of IDEAL LIFE's wireless devices.
- Without in-home access to a landline or the internet, use cellular connectivity.
- For easy, on-the-go use the IDEAL LIFE App™, IDEAL LIFE Health Tablet™ and IDEAL LIFE Kiosk™.

**2 Take a reading**

- Information will be automatically saved and transmitted to a secure information management system.
- No need for a personal computer, cumbersome wires or manual data entry.

**3 Receive Feedback from Caregivers**

- A healthcare team, which may include physicians, nurses and/or family members, can access the readings and assist with healthcare decisions

## PRODUCT SPECIFICATIONS

Model:	GMM 0001 IDEAL LIFE Gluco Manager™
Display:	LCD Digital Display
Power Source:	Two 1.5V AAA alkaline batteries
Battery Life:	Over 200 determinants
Operating Temperature/Humidity:	50°F to 104°F (10°C to 40°C), below 85% R.H. (non-condensing)
Meter Storage Temperature/Humidity:	-4°F to 140°F (-20°C to 60°C), below 95% R.H.
Weight:	103.5 g
Dimension:	97 mm (l) x 77.7 mm (w) x 24.8 (h)
Auto Electrode Inserting Detection:	YES
Auto Sample Loading Detection:	YES
Sleeping Mode Power Consumption:	Less than 500uA
Auto Shut Off:	After 2 minutes without action
Measurement Units:	mg/dL or mmol/L

**Note:** These specifications, to improve performance, are subject to change without notice.
