STATE LAW/REGULATIONS	MEDICAID PROGRAM
Definition of telemedicine/telehealth	
<p>“Telehealth is an electronic real-time synchronized audio-visual contact between a consultant and participant related to the treatment of the participant. The consultant and participant interact as if they were having a face-to-face service.”</p> <p><i>Source: ID Administrative Code 16.03.10.681 (2012).</i></p> <p>Psychiatric Telehealth is an electronic real time synchronous audio-visual contact between a physician and participant related to the treatment of the participant. The participant is in one (1) location, called the hub site, with specialized equipment including a video camera and monitor, and with the hosting provider. The physician is at another location, called the spoke site, with specialized equipment. The physician and participant interact as if they were having a face-to-face service.</p> <p><i>Source: ID Administrative Code 16.03.09 Sec. 502</i></p> <p>Telehealth services means health care services provided by a provider to a person through the use of electronic communications, information technology, asynchronous store and forward transfer or synchronous interaction between a provider at a distant site and a patient at an originating site. Such services include, but are not limited to, clinical care, health education, home health and facilitation of self-managed care and caregiver support.</p> <p><i>Source: ID House Bill 189 (2015) & ID Code Sec. 54-5603.</i></p> <p>Recently Passed Rule (Now Effective) Telehealth is synchronous interaction telehealth encounters, delivered as defined in Title 54, Chapter 57, Idaho Code.</p> <p><i>Source: ID Administrative Code 16.03.09 Sec. 502.</i></p>	<p>Telehealth is health care services provided by a provider to a participant through the use of electronic communications, information technology, synchronous interaction between a provider at a distant site and a patient at an originating site.</p> <p><i>Source: Medicaid Telehealth Policy, Rev. 2/1/2016.
