Comments: In 1998, the Child Protection Team (CPT) Program implemented a telemedicine network that links CPT teams with remote or satellite CPT offices, or local facilities, such as hospital emergency rooms, county health departments, or child advocacy centers, to facilitate telemedicine assessments for abuse, abandonment, and neglect of children in remote or rural areas.

Only specially trained CPT physicians, advanced registered nurse practitioners or physician assistants can perform these exams. And only specifically trained registered nurses at presenting sites may participate in the exam.
