## mTelehealth CarePoint Station™ and Virtual Clinic - Supported Devices

Utilizing an open architecture, our platform includes out-of-the-box support for 200+ diagnostic and peripheral devices. While maintaining built-in capabilities for advanced telemedicine use cases like Remote Patient Monitoring and Chronic Care Management, our platform facilitates the use of telemedicine-enabled devices to allow our users to scale-up as needed in order to build more advanced offerings for their patients and providers. Our team will work with you to understand what devices make sense for your organization and we will support you with training and ongoing customer service as your telemedicine presence expands.
