STATE LAW/REGULATIONS	MEDICAID PROGRAM
Definition of telemedicine/telehealth	
<p>"Telehealth" means the evaluation, diagnosis, or interpretation of electronically transmitted patient-specific data between a remote location and a licensed health care professional that generates interaction or treatment recommendations. "Telehealth" includes telemedicine and the delivery of health care services provided by way of an interactive telecommunications system, as defined in subsection (a) of Section 356z.22 of the Illinois Insurance 20 Code.</p> <p>Telemedicine means the performance of any of the activities listed in Section 49, including, but not limited to, rendering written or oral opinions concerning diagnosis or treatment of a patient in Illinois by a person in a different location than the patient as a result of transmission of individual patient data by telephonic, electronic, or other means of communication.</p> <p>"Telemedicine" does not include the following:</p> <ol style="list-style-type: none"> (1) periodic consultations between a person licensed under this Act and a person outside the State of Illinois; (2) a second opinion provided to a person licensed under this Act; and (3) diagnosis or treatment services provided to a patient in Illinois following care or treatment originally provided to the patient in the state in which the provider is licensed to practice medicine; and (4) health care services provided to an existing patient while the person licensed under this Act or patient is traveling. <p><i>Source: IL SB 1811 (2017).</i></p> <p>The Medical Practice Act of 1987 defines 'telemedicine' as "the performance of diagnosing patients, prescribing drugs, maintaining a medical office, etc., including but not limited to rendering written or oral opinions concerning diagnosis or treatment of a patient in Illinois by a person located outside the State of Illinois as a</p>	<p>"Telemedicine" is the use of a telecommunication system to provide medical services for the purpose of evaluation and treatment when the patient is at one medical provider location and the rendering provider is at another location.</p> <p><i>Source: IL Admin. Code, Title 89,140.403 (2012).</i></p> <p>"Telehealth is defined as the use of a telecommunication system to provide medical services between places of lesser and greater medical capability and/or expertise, for the purpose of evaluation and treatment. Medical data exchanged can take the form of multiple formats: text, graphics, still images, audio and video. The information or data exchanged can occur in real time (synchronous) through interactive video or multimedia collaborative environments or in near real time (asynchronous) through "store and forward" applications."</p> <p><i>Source: IL Dept. of Healthcare and Family Svcs., Expansion of Telehealth Services, Informational Notice, Jan. 1, 2010.
